Instructions for Form 4136

Section references are to the Internal Revenue Code.

Purpose of Form

Use Form 4136 to claim a credit for the Federal excise tax on fuels sold or used for nontaxable uses during the income tax year. However, you may use **Form 8849**, Claim for Refund of Excise Taxes, to claim a periodic refund of excise taxes instead of waiting to claim an annual credit on Form 4136.

Partnerships. Partnerships (other than electing large partnerships) cannot file this form. Instead, they must include a statement on **Schedule K-1 (Form 1065)**, Partner's Share of Income, Credits, Deductions, etc., showing the allocation to each partner specifying the number of gallons of each fuel used during the tax year, the applicable credit per gallon, and the nontaxable use or sale.

Amending Your Fuel Tax Credit

Generally, you may **not** amend a previously filed Form 4136 to add to amounts already claimed. See **Pub. 378**, Fuel Tax Credits and Refunds, for rules explaining when you may amend your income tax return to claim other fuel tax credits.

Recordkeeping

You must keep records to support any credits claimed on this return for at least 3 years from the date the return is due or filed, whichever is later.

Reporting Fuel Tax Credit in Income

You must include in your gross income the amount of the credit from line 9 if you took a deduction on your tax return that included the amount of the taxes and that deduction reduced your income tax liability. See **Pub. 378** for more information.

Additional Information

- **Pub. 378**, Fuel Tax Credits and Refunds, has more information on nontaxable uses.
- **Pub. 225**, Farmer's Tax Guide, also includes information on credits for Federal excise tax on fuels.

Specific Instructions

Attach separate sheets showing any additional information required for your claim such as the computation of the amount to be credited. Be sure to write your name and taxpayer identification number (TIN) on each sheet.

Complete and attach all information requested for each claim you make. Generally, you must enter the number (when requested) from the **Type of Use Table**, the number of gallons, and the amount of credit. If you need more space for any line (for example, for more types of use), prepare a continuation sheet using the same format as the line.

Amount of credit. For lines 1 through 7, multiply the rate by the number of gallons. For line 8, multiply the rate by the number of gallons of gasoline. Enter the combined result as indicated by the brackets in the amount of credit column including amounts on any continuation sheets.

Type of Use Table

The following table lists the nontaxable uses of fuels. You must enter the number from the table in the **Type of use** column.

No.	Type of Use
