## INTRODUCTION

This publication contains the validation criteria and record layouts for transmitting Form 1065, U.S. Partnership Return of Income tax return electronically to the Tennessee Computing Center (TCC) in Memphis. This publication should be used in conjunction with **Publication 3416**, Electronic Filing of Form 1065, U.S. Partnership Return of Income (Publication 1525 Supplement) and **Publication 1524**, Procedures and Specifications for Electronic Filing of Form 1065, U.S. Partnership Return of Income. Software developers and transmitters should use both publications and must transmit test returns using IRS **Publication 3225**, Test Package for Electronic Filers of Form 1065, U.S. Partnership Return of Income.

These publications are available from the Electronic Filing Unit at the Memphis IRS Center and are mailed automatically to applicants as appropriate, based on their intended participation. You may also call 1-800-829-3676 for additional copies of both publications. The publications are also available through the Electronic Filing Bulletin Board Systems.

The Electronic Filing Systems Bulletin Board operates seven days a week. The system is unavailable 4:00 am Eastern Time for approximately 30 - 60 minutes for maintenance. This system provides general and specific program information on the Electronic Filing Program. Filers, using an asynchronous (14.4 BPS or less) and communication software can access the bulletin board by dialing (606) 292-0137. The communication software should have the following protocol: Full Duplex, No parity, 8 data bits, 1 stop bit, and ANSI Terminal Emulation. If you need assistance with accessing the Electronic Filing Systems Bulletin Board, call the Bulletin Board Help Line on (606) 292-5031.

If information in this publication changes between its annual revision, a change page(s) may be issued. All new information, changes or deletions will be denoted by a vertical bar “ | ” in the right margin. Any information that is changed, added, or deleted in this publication will also be relayed via the Electronic Filing Systems Bulletin Board.

The user's cooperation is requested in the development of a quality publication. If you are aware of any errors (typographical, technical or usage) or if you have any suggestions and/or comments please let us know.

## SECTION 1 FEPS TRANSMISSION VALIDATION

### .01 FRONT-END PROCESSING SUBSYSTEM (FEPS) VALIDATION CRITERIA

Below are the Communications Error Messages that will be transmitted from the Electronic Management System (Front-End Processing Subsystem(FEPS)) in the Communications Error Acknowledgment File. An aborted transmission could result from the following FEPS disconnect conditions:

- (a) **"MAXIMUM NUMBER UNSUCCESSFUL LOGON ATTEMPTS REACHED"** (The maximum number of 3 consecutive unsuccessful logon attempts were reached.)
- (b) **"NO TRANA RECORD RECEIVED"** (The TRANA record must be first.)
- (c) **"NO RECAP RECORD RECEIVED; POSSIBLY DUE TO A LINE PROBLEM"** (If the transmitter delays responding for 60 seconds or more, the transmission session will be terminated by the FEPS.)
- (d) **"LOGON ETIN AND ETIN IN THE TRANA RECORD WERE DIFFERENT"** (The Logon ETIN should match the ETIN in positions 84-88 of the TRANA Record.)
- (e) **"TRANSMITTER WAS NOT READY TO RECEIVE ACKNOWLEDGMENT FILE"** (The transmitter must respond with a "Y" or "y"; anything else will cause the FEPS to disconnect the line.)
- (f) **"INVALID PROCESSING SITE DESIGNATOR."**  
(The site designator is found in position 74 of the TRANA Record.)  
  
"D" = Memphis Service Center
- (g) **"PROBLEM OCCURRED SENDING ACKNOWLEDGMENT FILE(S): YOU MAY CALL TO HAVE FILE(S) RESET"** (This can occur when the transmitter has begun transmitting records before picking up the ACK file, so both the transmitter and the FEPS are trying to communicate at the same time. It can also be line noise; or transmitter time-outs.)
- (h) **"INVALID TRANA: WRONG LENGTH OR EMBEDDED #"** (TRANA is 120 bytes in length and must be blank filled. The pound sign (#) must be in position 120 only.)
- (i) **"INVALID TRANB: WRONG LENGTH OR EMBEDDED #"** (The same conditions as in TRANA.)

**.01 FEPS VALIDATION CRITERIA - (Continued)**

- (j) **"INVALID RECAP: WRONG LENGTH OR EMBEDDED #"** (The same conditions apply as in TRANA.)
- (k) **"MULTIPLE TRANA/TRANB RECORDS DETECTED"**
- (l) **"INVALID PRODUCTION-TEST CODE - P= PRODUCTION, T = TEST"** (TRANA field PRODUCTION-TEST CODE must be a P or T.)
- (m) **"PRODUCTION-TEST CODE IN TRANA RECORD DOES NOT MATCH PROFILE"**. (TRANA field PRODUCTION-TEST CODE must match FEPS transmitter profile for the Production-Test Code Indicator stored in the Transmitters Profile Database).
- (n) **"INVALID TRANSMISSION TYPE CODE"** (TRANA field TRANSMISSION TYPE CODE must be equal to **"P"** for Partnership Return.)
- (o) **"INVALID TOTAL RETURN COUNT IN RECAP"; DOES NOT MATCH 1065 PG01 COUNT"** (The number of 1065 PG01 counts by the FEPS does not match the "Total Return Count" in the RECAP Record)
- (p) **"INVALID JULIAN DAY IN THE TRANA RECORD"** (The Julian Day in the TRANA Record cannot be more than two days prior to the actual receipt Julian day or more than one day after the actual receipt Julian day)

## SECTION 2 EFS TRANSMISSION VALIDATION

The Electronic Filing System (EFS) also validates the Transmission (TRANA and TRANB) Records. The following Error Reject Codes (ERC) and Validation Criteria pertain to the TRANA and TRANB Records only. The error reject code values will be generated and listed on the Acknowledgement Report whenever an invalid condition is met.

### .01 EFS TRANSMISSION VALIDATION CRITERIA

#### REJECT VALIDATION CRITERIA CODE

## SECTION 6 ACKNOWLEDGEMENT FILE FORMAT

### .01 ACKNOWLEDGEMENT FILE COMPONENTS

1. The IRS will acknowledge all transmissions by sending an Acknowledgement File (ACK File) to the transmitter. The Acknowledgement File identifies which returns have been accepted, rejected, or identified as duplicates. The Acknowledgement File will be available from the IRS service center to the Transmitter within **two workdays** from the original transmission. The Acknowledgement File must be retrieved before sending a return file transmission.
2. If the **entire transmission is rejected**, the ACK File will contain the following:
  - a. The original transmitter records (TRANA and TRANB).
  - b. One ACK Record Set consisting of an ACK Key Record with a “T” in the Acceptance Code Field, and one ACK Error Record containing all transmission reject errors related to this transmission.
  - c. The RECAP Acknowledgement Record (ACK RECAP Record) with fields pertaining to accepted and rejected returns zero-filled.
3. If the **transmission is accepted**, the Acknowledgement File will contain the following:
  - a. The original TRANA and TRANB sent by the transmitter with (Field #9998) of the TRANA Record updated with an IRS entry indicating the FEPS (Front-End Processing Subsystem/Front End Processor) CPU Designator.
  - b. Next, an Acknowledgement Record (ACK Record Set) is sent for each recognizable return transmitted.
  - c. Next, the RECAP Acknowledgement Record (ACK RECAP Record), which is the original RECAP Record updated with counts of the total accepted, duplicated, rejected returns, and IRS computed return count.
  - d. Finally, the FEPS generated Acknowledgement File Name containing an ETIN and an IRS generated sequence number.

## .01 ACKNOWLEDGEMENT FILE COMPONENTS – (Continued)

4. The acknowledgement of a partnership return is the ACK Record Set. An ACK Record Set consists of one ACK Key Record for an accepted return, or one ACK Key Record followed by up to 12 ACK Error Records for a rejected return.
  - a. The ACK Key Record contains information to identify the return it represents, plus a field to indicate how many (if any) ACK Error Records follow. See the Acknowledgement Key Record Layout for the Values of the Acceptance Code.
  - b. If present, each ACK Error Record will contain data defining the Form Record Number, the Form Occurrence for multiple occurrences of forms or schedules, the Field Sequence Number, and the Error Reject Code describing the specific error encountered – for up to eight unique errors.
5. Any tax return with an “**A**” in the Acceptance Reject Code Field has been accepted as a filed tax return and will be processed in the same manner as a return submitted as a paper document. This does not imply that the return will pass all IRS Service Center validity checks or post to the IRS Master File without delays.
6. If an ACK KEY Record contains an “**R**” in the Acceptance Code Field, the return has been rejected due to a fatal error involving the return format, internal consistency, or data errors in a key field, and must be corrected and resubmitted to the IRS to be considered as a filed return.
7. If an ACK KEY Record contains an “**D**” in the Acceptance Code Field, the return has been identified as a duplicate record, (i.e., a return record has previously been transmitted and accepted for the Primary EIN) or 2 or more returns with the same Primary EIN have been submitted on one transmission.
8. **Up to 96, three –position, Reject Codes** may be furnished to the Electronic Filer on the ACK Error Record(s). Filers should use these Error Reject Codes to determine the source of the error causing the return or transmission to reject. Error Reject Code “613” is generated if more than the maximum number of reject conditions (96) are identified.
9. Error Reject Codes and references to validation criteria related to the errors are listed in Section 2. Filers should use this information to resolve reject conditions. When a condition cannot be resolved with the information provided, the filer should contact the Electronic Filing Unit at the Memphis IRS Center for assistance at (901) 546-2690.

## **.02 RECEIVING THE ACKNOWLEDGEMENT FILE**

1. After the FEPS has verified that the transmitter is an authorized user and after a VALID logon, the following messages are sent from the FEPS back to the transmitter:

### **ARE YOU READY TO RECEIVE ACKNOWLEDGMENT FILE(S) - (Y/N)? [N]**

**NOTE:** The default is N, to receive acknowledgment files, you must enter "Y" or "y", followed by carriage return "<cr>" to override. If not, you will be disconnected because it is a requirement of IRS e-file to pick up ACK Files timely. The next time you logon, you will be sent a Communications Error Acknowledgment File with the following message:

### **TRANSMITTER WAS NOT READY TO RECEIVE ACKNOWLEDGMENT FILE**

2. If an Acknowledgment File (Ack File) for a previous transmission of electronic returns or any Communications Error Acknowledgment Files from a previous aborted transmission is ready, it will be transmitted from the FEPS to the filer before any new returns can be transmitted to the Service. Be aware of multiple ACK Files.
3. If the transmitter has no Ack File or Communications Error Ack File(s) from previous transmissions, the FEPS will transmit a standard "Dummy" Ack File with the following message:

### **THIS IS A DUMMY ACKNOWLEDGMENT FILE**

4. If the Acknowledgment File is not received within two workdays, or if acknowledgments are received for returns which were not transmitted on the designated transmission, immediately contact the Electronic Filing Unit Help Desk at the Memphis IRS Center for assistance at (901) 546-2690.

## .02 RECEIVING THE ACKNOWLEDGEMENT FILE - (Continued)

5. The transmitter should match the Acknowledgment File back to the original file transmitted by using the IRS-assigned file name, a combination of ETIN and sequence number. If no ACK File is received, call the Help Desk to be sure that there is not a processing delay. Any electronically transmitted return which is not acknowledged by the Service has NOT been accepted for processing, and must be resubmitted and acknowledged as accepted before it is considered a filed return.
6. When a return has been rejected after three attempts, contact the Electronic Filing Unit Help Desk at the Memphis IRS Center for assistance.
7. **NOTE:** If using XMODEM and any other YMODEM protocol, the Acknowledgement Files are concatenated within a single transmission. The receiver must name the file and must look for each RECAP Record to find each Acknowledgement File.
8. **NOTE:** If using YMODEM-BATCH (FTPI “y” or “Y”), then the Acknowledgement Files are sent separately within the transmission. Block zero (“0”) identifies the filename. Data is transmitted starting in Block one (“1”) up to Block “255” and then rolls to Block “0”. The last block for the file is padded with “Ctrl Z” characters. The next transmission packet should be the End of Transmission (EOT) character. If there is another file, the next block, Block “0” will contain the next filename. Otherwise a Block “0” without a filename will be followed by the EOT character.
9. **NOTE:** If using ZMODEM or YMODEM Batch, Acknowledgment Files are sent separately within the transmission, with “zfile” and “eof” in between each file, with a “zfin” at the end of all files. The IRS system will supply the file name (ETIN plus sequence number) to the Transmitter at the end of the “Successful Completion” message.
