returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Background

This document contains amendments to excise tax regulations (26 CFR parts 48 and 145) that implement certain changes made by the Taxpayer Relief Act of 1997 (the 1997 Act) relating to taxes on kerosene, aviation fuel, and heavy vehicles.

Kerosene; the 1997 Act

Section 4081 imposes a tax on certain removals, entries, and sales of taxable fuel. Before July 1, 1998, taxable fuel means gasoline and diesel fuel. As of that date, however, the definition of taxable fuel is expanded by the 1997 Act to include kerosene. Thus, after June 30, 1998, tax is imposed on the removal of kerosene from a terminal at the terminal rack.

In addition, the 1997 Act extends the rules for the exemption of dyed diesel fuel to dyed kerosene. Thus, tax is not imposed on kerosene that (1) the IRS determines is destined for a nontaxable use (such as for heating), (2) is indelibly dyed in accordance with IRS regulations, and (3) meets any marking requirements that may be prescribed in regulations.

Also, the 1997 Act provides that undyed kerosene that is destined for a nontaxable use may be removed, entered, or sold tax free in three situations. First, in the case of aviation-grade kerosene, dyeing is not required if the kerosene is received by a person that is registered by the IRS for purposes of the aviation fuel tax imposed by section 4091. Second, dyeing

is not required for feedstock kerosene that is received from a pipeline or vessel by a registered kerosene feedstock user. Kerosene used as a feedstock by other persons is exempt from the dyeing requirement to the extent provided by regulations. Finally, to the extent prescribed by regulations, dyeing is not required if kerosene is received by a registered wholesale distributor that sells kerosene exclusively to ultimate vendors that sell kerosene from a pump that is not suitable for use in fueling any diesel-powered highway vehicle or train (a blocked pump).

The 1997 Act adds section 4101(e) to provide that a terminal for kerosene or diesel fuel cannot be an approved terminal unless the operator of the terminal offers dyed diesel fuel and dyed kerosene for removal for nontaxable use. This provision is not applicable until July 1, 2000.

The 1997 Act generally applies to kerosene the credit and refund rules that apply to diesel fuel. Thus, a credit or refund is allowable to a registered ultimate vendor that sells taxed, undyed kerosene for use on a farm for farming purposes or for the exclusive use of a state or local government. In addition, a credit or refund is allowable to a registered ultimate vendor that sells taxed, undyed kerosene from a blocked pump or, to the extent provided by the Secretary of the Treasury, for blending with heating oil to be used during periods of extreme or unseasonable cold.

Kerosene; explanation of provisions

Because kerosene is classified as a taxable fuel as of July 1, 1998, the rules (including definitions) in the existing regulations that apply to taxable fuel generally apply to kerosene.

The temporary regulations define kerosene as the kerosene described in ASTM Specification D 3699 (No. 1-K and No. 2-K) and ASTM Specification D 1655 (kerosene-type jet fuel).

Under the temporary regulations, tax is not imposed on the removal, entry, or sale of kerosene that is dyed with dye of the same strength and composition that is now required for diesel fuel. Also, every retail pump where dyed kerosene is sold must display a prescribed notice similar to the one now required on dyed diesel fuel pumps.

Under the temporary regulations, tax generally is not imposed on aviation-grade kerosene if the person that receives the kerosene in a transaction otherwise subject to tax (such as a person that buys kerosene at a terminal rack) is registered with respect to the section 4091 tax and, for sales after September 30, 1998, certifies that the kerosene will be used as a fuel in an aircraft. These buyers include registered aviation fuel producers (that is, persons with IRS registration numbers with an "H" suffix) and registered commercial airlines.

Transitional rules provide that tax generally is not imposed on aviation-grade kerosene that is destined for use as aviation fuel if an unregistered person (such as a fixed-base operator)

receives the kerosene at a terminal rack and certifies (for sales after September 30, 1998) that the kerosene will be used as a fuel in an aircraft. The Treasury Department is considering whether this provision should be made a part of the final regulations, or whether persons that are presently unregistered should be required to register in order to receive aviation-grade kerosene tax free and requests comments on this issue. Comments may be submitted in the manner described under the ADDRESSES caption in the notice of proposed rulemaking on these subjects in the Proposed Rules section of this issue of the **Federal Register**.

The temporary regulations describe the conditions under which a registered ultimate vendor may be eligible for a credit or refund with respect to taxed kerosene that it sells from a blocked pump. A blocked pump is defined as a fuel pump that is at a fixed location and that cannot be used to fuel any diesel-powered highway vehicle or train. Also, blocked pumps must display a prescribed notice.

The temporary regulations do not provide rules for the following: (1) the exception from the dyeing requirement for kerosene that is removed from a terminal for use as a feedstock, (2) the exception from the dyeing requirement for kerosene that is received by a registered wholesale distributor that sells kerosene exclusively to ultimate vendors that sell kerosene from a blocked pump, (3) the availability of a credit or refund to a registered ultimate vendor that sells kerosene for blending with heating oil to be used during periods of extreme or unseasonable

cold, and (4) the requirement that a terminal for kerosene or diesel fuel cannot be an approved terminal unless the operator of the terminal offers dyed diesel fuel and dyed kerosene for removal for nontaxable use. Comments are also requested on these issues. Comments may be submitted in the manner described under the ADDRESSES caption in the notice of proposed rulemaking on these subjects in the Proposed Rules section of this issue of the **Federal Register**.

Aviation fuel

The 1997 Act added section 4091(d), which allows a registered aviation fuel producer (including a registered wholesale distributor) to obtain a refund of tax previously paid on aviation fuel that it buys. The temporary regulations describe the procedures to be followed for the allowance of this refund. These procedures are similar to the procedures under section 4081(e) for refunds relating to taxable fuel on which two taxes have been paid.

Registration of heavy vehicle manufacturers and retailers

The tax on the sale of heavy vehicles imposed by section 4051 is a tax that applies to the first retail sale by the manufacturer, importer, or retailer of a vehicle. The tax is not imposed if a vehicle is sold for resale or for lease on a long-term basis. Under existing regulations, this tax-free treatment applies only if both the seller and the buyer are registered by the IRS. Under the 1997 Act, however, the Treasury Department is to revise those regulations so that those sales may be made tax

free even if the parties have not been registered by the IRS.

These temporary regulations generally provide that a person, such as a vehicle manufacturer, may sell a vehicle tax free if it accepts from its buyer, such as a vehicle retailer, a prescribed statement, signed under penalties of perjury, stating that the buyer will resell the vehicle or lease it on a long-term basis. Neither party will be required to be registered.

The temporary regulations do not affect the registration requirements for tax-free sales under section 4221, such as sales for the exclusive use of a state or local government.

Special Analyses

It has been determined that this Treasury decision is not a significant regulatory action as defined in EO 12866. Therefore, a regulatory assessment is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations. It is hereby certified that the collection of information in these regulations will not have a significant economic impact on a substantial number of small entities. This certification is based upon the fact that the time required to prepare and submit the exemption certificates described in these regulations (many of which are similar to certificates that are already in use) is minimal and will not have a significant impact on those small entities that choose to provide the certificates. Therefore, a Regulatory Flexibility Analysis under the Regulatory Flexibility Act (5 U.S.C. chapter 6) is not required. Pursuant to section

7805(f) of the Internal Revenue Code, these temporary regulations will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small business.

Drafting Information

The principal author of these regulations is Frank Boland, Office of the Assistant Chief Counsel (Passthroughs and Special Industries), IRS. However, other personnel from the IRS and Treasury Department participated in their development.

Any seller that fails to post the required notice on any retail pump or other delivery facility where it sells dyed kerosene is, for

purposes of the penalty imposed by section 6715, presumed to know that the fuel will not be used for a nontaxable use.

(b) Effective date. This section is applicable after June 30, 1998.

§48.4082-8T Kerosene; exemption for aviation-grade kerosene (temporary).

(a) Overview. This section provides rules for exempting aviation-grade kerosene from the tax imposed by section 4081. Generally, under prescribed conditions, tax is not imposed on a removal, entry, or sale of aviation-grade kerosene if the kerosene is destined for use as a fuel in an aircraft.

(b) Definition.

Aviation-grade kerosene means kerosene-type jet fuel described in ASTM Specification D 1655 and military specifications MIL-T-5624R and MIL-T-83133D (Grades JP-5 and JP-8). For availability of ASTM and military specification material, see §48.4081-1(c)(2)(i).

(c) Removals and entries not in connection with sales. Tax is not imposed by section 4081 on the removal or entry not in connection with a sale of aviation-grade kerosene if--

(1) The person otherwise liable for tax is a taxable fuel registrant;

(2) In the case of a removal from a terminal, the terminal is an approved terminal; and

(3) The kerosene will be used as fuel in an aircraft and--

(i) The person otherwise liable for tax subsequently

delivers the kerosene into the fuel supply tank of an aircraft or is registered under section 4101 with respect to the tax imposed by section 4091; or

(ii) The section 4091 tax has been imposed on the kerosene.

(d) Removals and entries in connection with sales. Tax is not imposed under section 4081 on the removal or entry of aviation-grade kerosene in connection with a sale if--

(1) The person otherwise liable for tax is a taxable fuel registrant;

(2) In the case of a removal from a terminal, the terminal is an approved terminal; and

(3) The kerosene will be used as fuel in an aircraft and--

(i) The buyer is registered under section 4101 with respect to the tax imposed by section 4091;

(ii) The buyer is buying for its use in a nontaxable use (as defined in section 4092(a)); or

(iii) The section 4091 tax is, or has been, imposed on the kerosene.

(e) Evidence under paragraph (d)(3)--(1) In general--(i) Sales before October 1, 1998. For sales before October 1, 1998, the requirements of paragraph (d)(3) of this section will be considered to have been met if the person otherwise liable for tax has an unexpired certificate (described in this paragraph (e)) from the buyer and has no reason to believe that any information in the certificate is false.

(ii) Sales after September 30, 1998. For sales after

September 30, 1998, the requirements of paragraph (d)(3) of this section are met only if the person otherwise liable for tax has an unexpired certificate (described in this paragraph (e)) from the buyer and has no reason to believe that any information in the certificate is false.

(2) Certificate. The certificate to be provided by a buyer of aviation-grade kerosene is a statement signed under penalties of perjury by a person with authority to bind the buyer, in substantially the same form as the model certificate provided in paragraph (e)(4) of this section, and that contains all information necessary to complete the model certificate. A new certificate or notice that the correct certificate is invalid must be given if any information in the current certificate changes. The certificate may be included as part of any business records normally used to document a sale. The certificate expires on the earliest of the following dates:

(i) The date one year after the effective date of the certificate (which may be no earlier than the date it is signed).

(ii) The date the buyer provides a new certificate or notice that the current certificate is invalid to the seller.

(iii) The date the seller is notified by the Internal Revenue Service or the buyer that the buyer's right to provide a certificate has been withdrawn.

(3) Withdrawal of the right to provide a certificate. The Internal Revenue Service may withdraw the right of a buyer of aviation-grade kerosene to provide a certificate under this

section if the buyer uses or disposes of aviation-grade kerosene to which a certificate applies other than as a fuel in an aircraft. The Internal Revenue Service may notify any seller to whom the buyer has provided a certificate that the buyer's right to provide a certificate has been withdrawn.

(4) Model certificate.

(5) Sale to multiple buyers. If a first producer's report relates to aviation fuel that is divided among more than one buyer, multiple copies of the first producer's report should be made at the stage that the aviation fuel is divided and a copy given to each buyer. The reporting requirements of this paragraph (c) will be met only with respect to the fuel purchased by buyers that are given a copy of the report including any statement required under paragraph (c)(4) of this section.

(d) Form and content of claim--(1) In general. The following rules apply to claims for refund under section 4091(d):

(i) The claim must be made by the second producer and must

(3) It is identified with a legible and conspicuous notice stating: "UNDYED UNTAXED KEROSENE, NONTAXABLE USE ONLY".

(c) Conditions to allowance of credit or payment.

Notwithstanding §48.6427-9(c), a claim for a credit or payment with respect to undyed kerosene is allowable under section 6427(1)(5)(B)(i) if--

(2) The claimant sold the kerosene from a blocked pump;

(3) The claimant is a registered ultimate vendor of kerosene; and

(4) The claimant has filed a timely claim for a credit or payment that contains the information required under paragraph (e) of this section.

(d) Form of claim. The rules of §48.6427-9(d) apply to claims filed under this section.

(e) Content of claim. Each claim for credit or payment under this section must contain the following information with respect to all the kerosene covered by the claim:

(1) The total number of gallons covered by the claim.

(2) A statement by the claimant that tax has been imposed on the kerosene covered by the claim.

(3) The claimant's registration number.

(4) A statement that the claimant has not included the amount of the tax in its sales price of the kerosene and has not collected the amount of tax from its buyer.
