

## General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

### Purpose of Form

Housing credit agencies use Form 8823 to fulfill their responsibility under section 42(m)(1)(B)(iii) to notify the IRS of noncompliance with the low-income housing tax credit provisions **or** any building disposition.

The housing credit agency should also give a copy of Form 8823 to the owner(s).

### Who Must File

Any authorized housing credit agency that becomes aware that a low-income housing building was disposed of or is not in compliance with the provisions of section 42 must file Form 8823.

### When To File

File Form 8823 no later than 45 days after **(a)** the building was disposed of or **(b)** the end of the time allowed the building owner to correct the condition(s) that caused noncompliance. For details, see Regulations section 1.42-5(e).

### Where To File

File Form 8823 with the:  
Internal Revenue Service  
P.O. Box 331  
Attn: LIHC Unit, DP 607 South  
Philadelphia Campus  
Bensalem, PA 19020

## Specific Instructions

**Amended return.** If you are filing an amended return to correct previously reported information, check the box at the top of page 1.

**Item 2.** Enter the building identification number (BIN) assigned to the building by the housing credit agency as shown on Form 8609.

**Items 3, 4, 13b, and 13d.** If there is more than one owner (other than as a member of a pass-through entity), attach a schedule listing the owners, their addresses, and their taxpayer identification numbers. Indicate whether each owner's taxpayer identification number is an employer identification number (EIN) or a social security number (SSN).

Both the EIN and the SSN have nine digits. An EIN has two digits, a hyphen, and seven digits. An SSN has three digits, a hyphen, two digits, a hyphen, and four digits and is issued only to individuals.

**Item 7d.** "Reviewed by agency" includes physical inspection of the property, tenant file inspection, or review of documentation submitted by the owner.

**Item 8.** Enter the date that the building ceased to comply with the low-income housing credit provisions. If there are multiple noncompliance issues, enter the

date for the earliest discovered issue. **Do not** complete item 8 for a building disposition. Instead, skip items 9 through 12, and complete item 13.

**Item 9.** Enter the date that the noncompliance issue was corrected. If there are multiple issues, enter the date the last correction was made.

**Item 10.** Do not check this box unless the sole reason for filing the form is to indicate that previously reported noncompliance problems have been corrected.

**Item 11c.** Housing credit agencies must use either **(a)** the local health, safety, and building codes (or other habitability standards) or **(b)** the Uniform Physical Conditions Standards (UPCS) (24 C.F.R. section 5.703) to inspect the project, but not in combination. The UPCS does not supersede or preempt local codes. Thus, if a housing credit agency using the UPCS becomes aware of any violation of local codes, the agency must report the violation. Attach a statement describing either **(a)** the deficiency and its severity under the UPCS, i.e., minor (level 1), major (level 2), and severe (level 3) or **(b)** the health, safety, or building violation under the local codes. The Department of Housing and Urban Development's Real Estate Assessment Center has developed a comprehensive description of the types and severities of deficiencies entitled "Dictionary of Deficiency Definitions" found at [www.hud.gov/reac](http://www.hud.gov/reac) under Library Section, Physical Inspections, Training Materials. Under Regulations section 1.42-5(e)(3), report all deficiencies to the IRS whether or not the noncompliance or failure to certify is corrected at the time of inspection. In using the UPCS inspection standards, report all deficiencies in the five major inspectable areas (defined below) of the project: (1) Site; (2) Building exterior; (3) Building systems; (4) Dwelling units; and (5) Common areas.

**1. Site.** The site components, such as fencing and retaining walls, grounds, lighting, mailboxes, signs (such as those identifying the project or areas of the project), parking lots/driveways, play areas and equipment, refuse disposal equipment, roads, storm drainage, and walkways, must be free of health and safety hazards and be in good repair. The site must not be subject to material adverse conditions, such as abandoned vehicles, dangerous walkways or steps, poor drainage, septic tank back-ups, sewer hazards, excess accumulation of garbage and debris, vermin or rodent infestation, or fire hazards.

**2. Building exterior.** Each building on the site must be structurally sound, secure, habitable, and in good repair. Each building's doors, fire escapes, foundations, lighting, roofs, walls, and windows, where applicable, must be free of health and safety hazards, operable, and in good repair.

**3. Building systems.** Each building's domestic water, electrical system, elevators, emergency power, fire protection, HVAC, and sanitary system must be free of health and safety hazards, functionally adequate, operable, and in good repair.

**4. Dwelling units.** Each dwelling unit within a building must be structurally sound, habitable, and in good repair. All areas and aspects of the dwelling unit (for example, the unit's bathroom, call-for-aid (if applicable), ceilings, doors, electrical systems, floors, hot water heater, HVAC (where individual units are provided), kitchen, lighting, outlets/switches, patio/porch/balcony, smoke detectors, stairs, walls, and windows) must be free of health and safety hazards, functionally adequate, operable, and in good repair. Where applicable, the dwelling unit must have hot and cold running water, including an adequate source of potable water (note: single room occupancy units need not contain water facilities). If the dwelling unit includes its own bathroom, it must be in proper operating condition, usable in privacy, and adequate for personal hygiene and the disposal of human waste. The dwelling unit must include at least one battery-operated or hard-wired smoke detector, in proper working condition, on each level of the unit.

**5. Common areas.** The common areas must be structurally sound, secure, and functionally adequate for the purposes intended. The basement, garage/carport, restrooms, closets, utility rooms, mechanical rooms, community rooms, day care rooms, halls/corridors, stairs, kitchens, laundry rooms, office, porch, patio, balcony, and trash collection areas, if applicable, must be free of health and safety hazards, operable, and in good repair. All common area ceilings, doors, floors, HVAC, lighting, outlets/switches, smoke detectors, stairs, walls, and windows, to the extent applicable, must be free of health and safety hazards, operable, and in good repair.

**Health and Safety Hazards.** All areas and components of the housing must be free of health and safety hazards. These include, but are not limited to: air quality, electrical hazards, elevators, emergency/fire exits, flammable materials, garbage and debris, handrail hazards, infestation, and lead-based paint. For example, the buildings must have fire exits that are not blocked and have hand rails that are not damaged, loose, missing portions, or otherwise unusable. The housing must have no evidence of infestation by rats, mice, or other vermin. The housing must have no evidence of electrical hazards, natural hazards, or fire hazards. The dwelling units and common areas must have proper ventilation and be free of mold as well as odor (e.g., propane, natural, sewer, or methane gas). The housing must comply with all requirements related to the evaluation and reduction of lead-based paint hazards and have available proper certifications of such (see 24 C.F.R. part 35).

Project owners must promptly correct exigent and fire safety hazards. Before leaving the project, the inspector should provide the project owner with a list of all observed exigent and fire safety hazards. Exigent health and safety hazards include: air quality problems such as propane, natural gas, or methane gas detected; electrical hazards such as exposed wires or

open panels and water leaks on or near electrical equipment; emergency equipment, fire exits, and fire escapes that are blocked or not usable; and carbon monoxide hazards such as gas or hot water heaters with missing or misaligned chimneys. Fire safety hazards include missing or inoperative smoke detectors (including missing batteries), expired fire extinguishers, and window security bars preventing egress from a unit.

**Item 11d.** Report the failure to provide annual certifications or the provision of certifications that are known to be incomplete or inaccurate as required by Regulations section 1.42-5(c). As examples, report a failure by the owner to include a statement summarizing violations (or copies of the violation reports) of local health, safety, or building codes; report an owner who provided inaccurate or incomplete statements concerning corrections of these violations.

**Item 11e.** Report any federal grant made with respect to any building or the operation thereof during any taxable year in the compliance period. Report changes in common areas which become commercial, when fees are charged for facilities, etc. In addition, report any below market federal loan or any obligation the interest on which is exempt from tax under section 103 that is or was used (directly or indirectly) with respect to the building or its operation during the compliance period and that was not taken into account when determining eligible basis at the close of the first year of the credit period.

**Item 11f.** Failure to satisfy the minimum set-aside requirement for the first year of the credit period results in the permanent loss of the entire credit.

Failure to maintain the minimum set-aside requirement for any year after the first year of the credit period results in recapture of previously claimed credit and no allowable credit for that tax year. No low-income housing credit is allowable until the minimum set-aside is restored for a subsequent tax year.

**Item 11h.** All units in the building must be for use by the general public (as defined in Regulations section 1.42-9), including the requirement that no finding of discrimination under the Fair Housing Act occurred for the building. Low-income housing credit properties are subject to Title VIII of the Civil Rights Act of 1968, also known as the Fair Housing Act. It prohibits discrimination in the sale, rental, and financing of dwellings based on race, color, religion, sex, national origin, familial status, and disability. See 42 U.S.C. sections 3601 through 3619.

It also mandates specific design and construction requirements for multifamily housing built for first occupancy after March 13, 1991, in order to provide accessible housing for individuals with disabilities. The failure of low-income housing credit properties to comply with the requirements of the Fair Housing Act

will result in the denial of the low-income housing tax credit on a per-unit basis.

Individuals with questions about the accessibility requirements can obtain the Fair Housing Act Design Manual from HUD by calling 1-800-245-2691 and requesting item number HUD 11112, or they can order the manual through *www.huduser.org* under Publications.

**Item 11i.** The owner must rent to low-income tenants all comparable units that are available or that subsequently become available in the same building in order to continue treating the over-income unit(s) as a low-income unit. All units affected by a violation of the available unit rule may not be included in qualified basis. When the percentage of low-income units in a building again equals the percentage of low-income units on which the credit is based, the full availability of the credit is restored. Thus, only check the "Noncompliance corrected" box when the percentage of low-income units in the building equals the percentage on which the credit is based.

**Item 11q.** Check this box for noncompliance events other than those listed in 11a through 11p. Attach an explanation. For projects with allocations from the nonprofit set-aside under section 42(h)(5), report the lack of material participation by a non-profit organization (i.e., regular, continuous, and substantial involvement) that the housing credit agency learns of during the compliance period.

**Paperwork Reduction Act Notice.** We ask for the information on this form to carry out the Internal Revenue laws of the United States. You are required to give us the information. We need it to ensure that you are complying with these laws and to allow us to figure and collect the right amount of tax.

You are not required to provide the information requested on a form that is subject to the Paperwork Reduction Act unless the form displays a valid OMB control number. Books or records relating to a form or its instructions must be retained as long as their contents may become material in the administration of any Internal Revenue law. Generally, tax returns and return information are confidential, as required by section 6103.

The time needed to complete and file this form will vary depending on individual circumstances. The estimated average time is:

- Recordkeeping** . . . . . 7 hr., 39 min.
- Learning about the law or the form** . . . . . 3 hr., 16 min.
- Preparing and sending the form to the IRS** . . . . . 3 hr., 32 min.

If you have comments concerning the accuracy of these time estimates or suggestions for making this form simpler, we would be happy to hear from you. You can write to the Tax Products Coordinating Committee, SE:W:CAR:MP:T:T:SP, 1111 Constitution Ave., NW, IR-6406, Washington, DC 20224. Do not send Form 8823 to this address. Instead, see Where To File on page 2.
